FRONTAL PICTURE GUIDE

Tips for your perfect photo

- Take photos on a **solid background**
- Make sure the patient's **ears are visible** to ensure the perfect frontal position of the head.
- Make sure the patient is **not wearing any headgear or glasses**
- **Evenly light** the patient using a diffused light directed at the patient
- Keep the **camera at eye level** with the patient
- Ensure your patient shows you a large smile with upper and lower teeth slightly apart giving you space for your incredible Smile Design!

Bad Photos

Smile is closed and doesn't give space to design your smile

Glasses are still on the patient and obstructing the face

Head is tilted skewing the perspective

Hair is down covering the ears and the picture is to dark
